

Project Number 4 - Music as an Enhancement to Video

First: Choose a video! Mara has provided several options, or you may choose and download one of your own (but this takes extra time!)

Create a project that uses **Microphone** audio. Your project must include:

- a. A video with original sound that you create, where the sound lines up with the video
- b. At least one track recorded using a microphone
- c. Background music that sets the appropriate mood for your video
- d. Volume adjustments to make each track audible when it is important
- e. Audio effects on at least 2 tracks (INCLUDING your Microphone track) that are audible!

Grading Rubric				
	Exemplary	Accomplished	Developing	Beginning
Final Product	Final product contains all required elements, all of which work together cohesively	Final product contains most required elements, most of which work together cohesively	Final product contains some required elements, some of which work together	Final product is missing several required elements, or they don't work well together
Setup	Group is able to set up all recording and tracks independently	Group is able to set up all recording and tracks with minimal outside help	Group is able to set up recording and tracks with significant outside help	Group is unable to take part in setting up recording or tracks independently
Technical Skills: <i>Syncing sound with video</i> <i>Editing audio</i> <i>Volume adjustment</i> <i>Adding audio effects to recorded sound</i>	Audio works seamlessly with video; Audio effects enhance the video experience and recorded audio remains audible; Volume and panning are adjusted so that different tracks come to the forefront	Audio works usually lines up with video; Audio effects enhance the video experience but recorded audio is not always audible; Volume and panning are adjusted with the intention of bringing different tracks come to the forefront	Audio sometimes lines up with video; Audio effects sometimes enhance the video experience but recorded audio is usually inaudible; Volume and panning are rarely adjusted	Audio does not line up with video; Audio effects take away from the video experience and recorded audio is inaudible; Volume and panning are not adjusted
HOWL: Collaboration	Ensured that all group members were actively involved	Made a moderate effort to include everyone	Was not attentive to the group dynamic	Did not participate in the group
HOWL: Self-Discipline	Worked diligently at assigned task; found things to do when there was downtime	Worked moderately hard at assigned task; did not make good use of downtime	Worked occasionally on assigned task; made it difficult for others to focus	Did not work on assigned task or was disruptive
